Contents

Related Titles		vi
Preface		viii
Chapter 1.	**Cell-Specific Monoclonal Antibodies: Probes for Studying Retinal Organisation and Development** K. R. FRY and D. M.-K. LAM	1
Chapter 2.	**The Cytoskeleton of Retinal Pigment Epithelial Cells** K. OWARIBE	23
Chapter 3.	**S-Antigen: Structure, Function and Experimental Autoimmune Uveitis (EAU)** T. SHINOHARA, L. DONOSO, M. TSUDA, K. YAMAKI and V. SINGH	51
Chapter 4.	**The Role of Glycine in the Mammalian Retina** R. E. MARC	67
Chapter 5.	**Biochemistry and Localization of Somatostatin in the Retina** T. YAMADA	109
Chapter 6.	**Role of Melatonin in Retina** M. L. DUBOCOVICH	129
Chapter 7.	**Electrophysiology of Retinal Glial Cells** E. A. NEWMAN	153
Chapter 8.	**Monoclonal Antibodies to Rhodopsin and Other Proteins of Rod Outer Segments** R. S. MOLDAY	173
Chapter 9.	**Phosphoinositides in the Retina** R. E. ANDERSON and J. E. BROWN	211
Chapter 10.	**Phototransduction in the Microvillar Visual Cell of Limulus: Electrophysiology and Biochemistry** U. W. BECKER, J. H. NUSKE and H. STIEVE	229
Chapter 11.	**Signal Transmission from Rods to Bipolar and Horizontal Cells: A Synthesis** G. FALK	255
